The value of your investment and the income from it can go down as well as up, it may be affected by exchange rate variations, and you may not get back the amount invested. Past performance is no indication of current or future performance. Please ensure you read the Prospectus (including the Singapore Addendum) for this Fund before making an investment decision. These documents contain important information including risk factors, details of charges and selling restrictions.

**Note:** The fund invests in emerging markets which carry increased volatility and liquidity risks. It may invest in bonds which have a low or no credit rating including high yield and distressed bonds. These bonds may offer a higher income but carry a greater risk of default, particularly in volatile markets. Monthly income payments will fluctuate. In difficult market conditions, it may be harder for the manager to sell assets at the quoted price, which could have a negative impact on performance. In extreme market conditions, the fund's ability to meet redemption requests on demand may be affected. Some share classes charge all of their expenses to capital, which can reduce the potential for capital growth. This fund can invest more than 35% of its value in securities issued or guaranteed by an EEA state.
